Response to Arguments

Applicant's arguments with respect to prior claims 1-20 have been considered but are moot in view of the cancellation of these claims.

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

- As claimed in applicant's independent claims 21, and 25, prior art does not teach a heat-receiving unit thermally coupled to a heat generating object, a heat-transferring unit made up of a plurality of heat pipes mounted on the surface of the heat-dissipating surface of the heat-receiving unit, a heat-transferring unit mounted on the heat dissipating surface of the heat receiving unit with a heat conductive cover that covers the heat-transferring unit arranged between the heat-transferring unit and the heat dissipating unit, where the heat dissipating unit includes a plurality of independently formed heat dissipating plates arranged in the extending direction of the heat pipes such that each heat dissipating plate crosses the extending direction of the heat pipes.
- Dibene, II et al. (US 2002/0021556 A1) and Hsu (US 6,382,306 B1) teach some of the limitations of these claims. However, they do not meet all the limitations.

- As claimed in applicant's independent claims 23 and 27, prior art does not teach a heat receiving unit having a heat receiving surface and an opposite heat dissipating, the heat receiving surface being thermally coupled to the heat generating object, a heat transferring unit mounted on the heat receiving surface of the heat receiving unit excluding a portion of the heat receiving surface that is thermally connected to the heat generating object, a heat dissipating unit mounted on the heat dissipating surface of the heat receiving unit, wherein the heat dissipating unit includes a plurality of heat pipes each of which has a long shape and extends in the same direction as each other, and wherein the heat dissipating unit includes a plurality of heat dissipating plates which are formed independently of each other and arranged in the extending direction of each heat pipe, and where each heat dissipating plate extending in a direction which crosses the extending direction of each heat pipe.
 - Chao (US 6,424,528 B1), Ikeda et al. (US 2002/0007555 A1), Ueki et al. (US 6,317,322 B1), and Ikeda et al. (US 6,263,959 B1) teach some of the limitations of these claims. However, they do not meet all the limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
